### Distance Sensor with display Operating Instructions

DT50-P1113, DT50-P1114,  
DT50-N1113, DT50-N1114

DT50-P1123, DT50-P1124,  
DT50-N1123, DT50-N1124

Tested according to  
IEC 60825:2001  
EN 60825:2003

#### Safety Specifications

- Read the operating instructions before starting operation.
- Connection, assembly, and settings only by competent technicians.
- Protect the equipment against moisture and soiling when operating.
- No safety component in accordance with EU machine guidelines.
- CAUTION:** Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

#### Proper Use

The DT50 distance sensor is an opto-electronic sensor and is used for optical determination of object distances without contact.

#### Starting Operation

- Connect and secure cable receptacle tension-free.  
The following apply for connection in **1**: brn=brown, blk=black, blu=blue, wht=white, gra=grey.  
Q = Switching output, Q<sub>A</sub> = Analog output,  
MF = Multi-functional input.  
Connect cables.  
Fix sensor to suitable holders (e.g. SICK mounting bracket).  
Connect sensor to operating voltage (see type label).  
Adjustment:  
Align sensor that object is in measuring area and light spot at the correct position.  
Display:  
Current measurement distance or menu is displayed.  
(If below or above measuring range: MIN/MAX, if no measurement is possible: NoDist.)

#### Menu structure/Description of functionality

- 4mA** Automatic teaching of current distance to object as distance to be output with 4 mA or 0 V.
- 20mA** Automatic teaching of current distance to object as distance to be output with 20 mA or 10 V.
- Q-Set** Automatic teaching of current distance to object as switching threshold.
- 4mA** Manual adjustment of distance which is output with 4 mA or 0 V. (200...10,000 mm)
- 20mA** Manual adjustment of distance which is output with 20 mA or 10 V. (200...10,000 mm)
- Q-Set** Manual adjustment of switching threshold. (200...10,000 mm)
- QLogic** Setting of switch output logic. (Q, Q<sub>Q</sub>)
- Q-Hyst** Setting hysteresis. (10...1,000 mm)
- Average** Setting of moving averaging. Fast/Slow (1x/4x)
- MF** Setting functionality of multi-function input:
  - LsrOff: Switching off laser; when signal at MF is active
  - Teach: Teach 4 mA: 80 ms < MF active < 120 ms;  
Teach 20 mA: 180 ms < MF active < 220 ms;  
Teach Q: 280 ms < MF active < 320 ms;  
Teach Q: 380 ms < MF active < 420 ms
  - MF-Off: MF-Input is without functionality
- Display** Switch off display. (switch on again **Set** > 5 s)
- Reset** Reset to default settings.
- Lock** Activation of key lock.  
(De-activation of key lock **Set** > 5 s)

#### Maintenance

The SICK sensor does not require any maintenance. We recommend that you clean the external lens surfaces and check the screw connections and plug-in connections at regular intervals.

## DEUTSCH

### Distanzsensor mit Display Betriebsanleitung

DT50-P1113, DT50-P1114,  
DT50-N1113, DT50-N1114

DT50-P1123, DT50-P1124,  
DT50-N1123, DT50-N1124

Geprüft nach:  
IEC 60825:2001  
EN 60825:2003

#### Sicherheitshinweise

- Vor der Inbetriebnahme die Betriebsanleitung lesen.
- Anschluss, Montage und Einstellung nur durch Fachpersonal.
- Gerät im Betrieb vor Feuchte und Verunreinigung schützen.
- Kein Sicherheitsbauteil gemäß EU-Maschinenrichtlinie.

#### Wartung

Der Sensor ist wartungsfrei. Wir empfehlen, in regelmäßigen Abständen:  
- die optischen Grenzflächen zu reinigen,  
- Verschraubungen und Steckverbindungen zu überprüfen.
